Turning now to the right and then to flower of the family.

Miscellaneons,

A man he owned a terrior dog-A bub-inited, amony case; And that there deg got that there man In meny on unity muss.

For the cann was on his muscle, And the dea was on his bite; o to high that dog-goned animite Was sure to raise a fight

A woman owned a Thomas car That is at lifteen points. And other cats got up and shat When that there ext was round. The men and his dog came along one day Where this women she did dwell, And the "pup" he growled fereclously And went for that cut like-every thing.

Oh, the far it flew, and the "pup" he howled As the dawn went into bis hide, As the dawn went into bis hide, And the strips of flosh were form from his back. Then he flurmized, and kicked, and died. Then the man he ripped and corred and recore, And guthered a ling brick-but, And said he'd be damed cosmitally If no didn't kill that cut.

But the woman allowed she'd be blossed if he die And she snatched up an old shot-gap.
Which she fired, and poppored his displanger
With blid shot No. 1. So they toted him home on a window billed And the distorsemed like up, But he never was known to Solit syste Geto nown mother pap.

Folks may turn up their smoot at this here physic I don't care a cass for that; All I wanted to show was that fighting dogs May tarkle the wrong Tom cat.

Por the Gettyslang Campiler. South Mountain Rambles.

NO. X. THROUGH THE PARKS.

The winding path, extending for saveral miles along the banks of Marsh Creek, was made in part by the Moun-OFFICE in Methorryatown. Will attend to cartly specially portant and the Throat Langs and Heart special specia manifold. At one place we had to cut spirited thereby, the most youthful and our way for a considerable distance through thickets of underbrush, enlangled and matled with the thorny Smilax vine; at other places through a rope. Grasping the cable he moved dense growth of Laurel. With pick and shovel a way was made along a A huge tree that had fallen across the the great deligit of his fellow-laborers. creek was by art transformed into a who gazed as admiring speciators upon rustic foot bridge. Resting places were his acrobatic feats. All of a sudden

proof at our industry and of our engi. sanding in the initial mode of the needing skill. It affords as pleasure to guide occasional visitors over its long. The ends were still coiled about the extent, and to point out to them the trees, but that was all. And so our there are good schools. There are good schools. There are there are good schools. There are

"The Defeat," Hereby hangs a tale, Detroit on a bridal tour within an hour which I must needs anfold, The Mountain Ramblers, ambitious cables it was determined to use some

immensely long grape vines growing oosen those vines from the tall tree tops! But perseverance conquers, and joy as we behold these vines colled and wriggling like great scrpents upon the grabification. ground. Directly opposite on either bank were thick trees, growing in pairs, as if nature and designed them for the use to which we were about to put them. Circing one end of a vine aroundone of the trees we spiked it fast with many a stout

nail. The other end we wound around a tres on the opposite bank, but at the expense of much more strength. That ourselves prone on the ground, placed our feet against the tree for a fulcrum, and tugged and pulled and groaned until every slnew was strotched, and the perpiration dropped from every pore. At

ast our toil had its reward. The cable astened at both ends, formed a straight ine across the creek. It looked beautiful. We gazed upon it with intense satisfaction, Though our work was not yet half done we rejoiced as though left. He was asleep. William reached effort of his life. uspension bridge awong airy like before as. We saw lady visitors timidly stepping upon it, and appropriately shricking as it gently swared beneath them. We thought of the amusement we would have when the question would be asked; Who planned and built this pretty

graceful bridge?" and we would medestly give a truthful answer. The surprise, the doubt, the suspicion that we were joking, would not offend our sterl ing veracity because of the compliment to our skill that they conveyed. Full of such pleasant laughtings, and inngile rambler was seized with the desire to exhibit the skill he had acquired in former years in performing on the light blinself hand over hand to the middle of the creek. There he hung swaying steep bank. Mushy places were made along a condition of the creek. There he hung swaying more comin down on the next rise, whistle you'd make to be sure! for them and so much the worse for the vernment. MARING UNCLESAN FOOT THE BILLS The absenteeism among public officers is most shameful. Sometimes an officer is away for mouths at a time,

knows where he is. He went to California with his wife and others on free passes, and the clerks of his office have been doing his work. Before he took bis trip Postmaster General Key went to California and was gone two or three months. I believe both are put down among "the tours of inspection" we see so much about, in which case the government foots bie bills. Postmaster General Key is now off on snother "inagents in New England who know all

few weeks very pleantly and the govrnment will probably pay the fiddler. A few days ago Secretary Sherman went on a tour of "inspection." He has all the revenue cutters at his disposal and be can run down to Cape May, Allantic City or Long Branch on a tour o inspection very easily. Of course, the cutter burns coal, the officers are paid by Uncle Sam, all repairs are provided for and the mess bills are paid by the officers or from some government fund. Key and Sherman on an "inspection tour," however, are not half so ridiculous as the Secretary of the Navy, that old sea dog, whose battles none car count. He also goes on "inspection tours," in his paintial Tallapoosa, and he inspects all the navy yards just as though he knew all about them. Of course, the naval officers, and glorious, cospitable fellows they are, furnish the entertainments and pay the bills. I have never talked with Thompson about

EDWARD R. ADAMS killed a man at Roma, Ohio, ten years ago. The crime would probably have been pronounced by a jury manslaughter in a low degree. It there had been a trial, but Adams fled, and was not caught. He established himself in business at three different points in the West, under assumed mance but in each instance was frightened away by a glimpse of somebody from Rome. At length he enlisted for five years in the army. His term recently expired, and he returned to his old home, gave himself up, and requested a trial, being convinced that the penalty of his crime cauld not be worse than to remain a fugitive.

NEWSPAPERARCHIVE®.

ORITYSBURG, Pale THURSDAY, JULY 31, 1379.

The Farm and Donse.

AGRICULTURAL NOTES, BY THE EDITOR.

- So valuable a crop as wheat should be started in the best manner possible. Oats stubbles should be plowed down at once. The ground must have time to settle before wheat seeding. - Our farmers should continue to grow Fullz wheat. It has proved itself well adapted to this locality.

- Commercial fertilizers we mean good ones-pay first on the wheat, and then on the grass. And the liberal ap-- Cats bereabouts is proving a fair

crop after all. Fall and winter apples will be light crops; peaches promise abundantly. - Complaints come from Scotland that American cheese is being imported into Ayishire in such quantities that much of the home produce of last your been deterred by the tendency of the

you can work well. It is easier and size, quality, heavy fleeces, and aptitude more profitable to reap forty bushels to fatten. from one acre than fifty from two. MANURING FOR WHEAT.

An Ohio farmer writes to the Coun

ry Gentleman as follows:

As soon as the field is well barrowed, rell down and drill in the wheat. If the land is cloddy, the relier or cloderusher should be used while the harrowing is being done, so as to get the smace as fine as possible. The crusher should be used with the larrowing is being done, so as to get the smace as fine as possible. The crusher is best to grid up the lumps. I pay great attention to fining the surface for all my crops. If the weather is dry when wheat is drilled in, a roller should be run over it after the drill. This will press the seed in and hold moisture. It also packs the manure and soil together, so that the best results are obtained from the manure. Any one not used to this mode of applying manure will wonder where all the bulk has gone, as the mest of it will be hid from sicht and incorporated with the acid.

comes sure also.

Some will ask why I use a stanting-toolh harrow. It is because the work is more effectually done, as every time in various or the test many for a few days, when they will be fit for use, passing over the teeth cut and press the the soil, and anything on the surface is drawn down into the soil, cut by the families: To each peck of fruit allow smoothing barrow can cut them, and the roller and crusher breaks them. I sometimes go over cloder ground with the roller, which breaks it manny limps and presses the rest even with the surface. Then I use a slanting-tooth harrow, which will cut the lumps which row, which will cut the lumps which

are bedded in, thus giving the sharting teeth their best hold. If any remain, the settles or constant is again used, and then the smoothing harrow to finish with. This mode will not disappoint any one having patience and persoverance enough to make a good farmer. I may hereafter give some of my views in egard to different kinds of harrows, Boardman, O., July 10.

gone, as the most of it will be hid from

cess, timothy sown in the fall with wheat will make a mak growth and lessen the yield of grain, but will insure a grass crop, and no failure, if seed enough has been used to give an even eatch. If a good wheat crop is very desirable, it is best to wait until spring before sowing the grass seed, when clover can be sown also if desired. I now undow the latter course and do not fail. adopt the latter course, and do not fail of white mustaid seed, four tablespoons-ot a good wheat crop, and the grass fuls of celery seed, and a piece of atum

push saide the material we so much in this way. I have for a vertical-tooth harrow is to Snow Pudding. Soak half a box of bring clods to the surface, so that the gelatine in a teacup of cold water, point amoothing barrow can cut them, and on it one plut of boiling water; set in a

fifteen or twenty years, than the Oxfordsire-Down. It is now somewhere about fifty years since Messrs, Druce of Eynsham, Gillett of Southleigh, Blake of Stanton Harcourt, and Twynham of of a new breed of sheep, that should in great measure possess the weight of the Longwood with the quality of the Down. Probably the advantage of such a breed was that apparent in the offspring of a cross occasionally resorted

to in the case of druft ewes, but from offspring to breed back to either side; and for many years after the breed had atticism. Some slight admixture of Sussex-Down may have been introduced by those early breeders; but we are of ful selection have resulted in a class of sheep which, under suitable conditions,

-St. Louis received the first bale of opinion that the Cotswold grey-faced new cotton of the crop of 1870 on July ram and the Hampshire-Down ewe were the, thirteen days earlier than the first the chief, if not the only, materials receipt last year. It sold for 23 cents which by judiclous blonding and carefrom the milk of sheep and goats. Of can be mentioned, both on account of sheep there are 23,000,000 in that counsize, weight of wool, aptitude to fatten try, and of goats 1,836,600. The aver- hardy character, and valuable meat age product of each animal is rated at The success of the early promoters of 11 pounds of cheese and 24 pounds of the project led many others into the field. It was not until 1850 that they - The weather in England has been were styled the Oxfordshire Down, the so bad and so unfavorable to a produc- county of Oxford being their strong-

tive harvest that the circumstance is hold; provious to this date they were treated as a national calamity, like war properly regarded as cross-breeds, and or pestilence, and Archbishop Tait of known as Down-Cotswolds, under which designation they achieved successes a the Smithfield shows. At the royal quest their clergy to offer up special inceting at Warwick in 15-, there were prayers for a more propitious season at thirty-seven entries; the first prize in the old class (comprising Oxfords,

The following rule in plowing is Shropshire, and Hampshire Downs) was recommended: "Never turn up over taken by the late Samuel Druce for a one or two inches of unfertile sub-soil sheep of this breed. In 1852 Mr. Blake's in one season, and, when so turned up, flock was distributed, and those who rethe land should receive a dressing of member attending the sale at Stanton Harcourt must have been struck with - Work not a rod of land more than their general uniformity of character,

From the Brilish Parliament and from the Council of Ministers in France we hear by cable the same demand for American grain. M. Lepete, Minister I take for granted that last winter's claud that, in consequence of a bad of the Interior at Versailles, has demanure has been carefully propared and crop, the purchases of foreign grain piled up, convenient to haul as soon as would amount to £20,000,000 stelling. the wheat ground is plowed. I also The demand for American grain is still take for granted that the rotation of more explicitly indicated in the British corn, oats and wheat is practiced, as Parliament. A few days ago a motion here. Although I do not regard this as was made in the House of Commons for the best chance for wheat, yet circum-the appointment of a royal commission stances seem to force us into this rota-to inquire into the causes of the agrition, and I will not now urgo my views cultural depression, and how far they are remediable by legislation. All sides As soon as the oat crop has been re- agree that "a great cause of the depresmoved, or even while the shocks are in sion was American competition." the field and not in the line of the plow, was also pointed out that the future of LOWEST PRICES. I mark out my lands seven or eight British agriculture is dependent upon steps wide, and back furrow four rounds the cost of production in America. Libon each one; then commence hauling erals and conservatives participated in

How to Both A Potato.—A said hing, and to be lamonted, that the so-cret has come down to so fow. Only the mealy potato is readily digosted; fow cooks know how to cook even good potatoes, so that they shall be mealy, potatoes, so that they shall be mealy.

The mealy potatoes are the fourth-bonse in the best of lamonter and a national solution of the fourth-bonse in the best of lamonte with so induction market and the best of liquins; and of the fourth-bonse in the best of liquins; and of the fourth-bonse in the best of liquins; and inviting.
